

AutoML Lecture - Exam

Summer Term 2026

Marcel Wever, Andreas Bentzen Winje

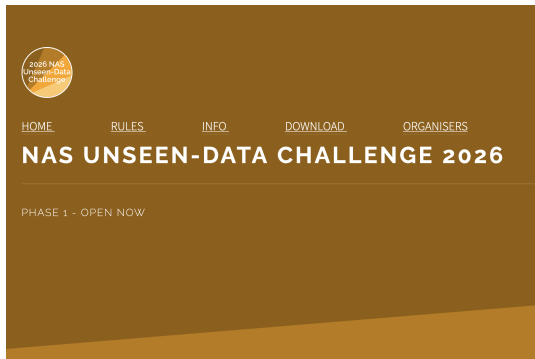

Final Project Exam

- Implement a larger project
 - We will provide an overall topic, and you have to decide how to solve it
 - Write a 1-page project proposal (incl. a research question, required steps and evaluation strategy) $\rightsquigarrow$ we will provide feedback on whether we believe that the project will be feasible or not
 - Team work with up to 3 students possible
- Exam: Poster Presentation
 - You will present your project results as a poster
 - We will provide a template for the poster and also will print it for you
 - Presentation will be done in two or three groups (depending on the number of students) s.t. some students are free to check out the others' posters

Final Project: NAS Unseen Data Challenge

- www.nascompetition.com
- In this competition, you will be asked to design a NAS pipeline, namely a data processor, a NAS algorithm, and a training policy.
- Bonus: The top team can travel to the AutoML conference, Ljubljana, Slovenia end of September.

Timeline Project: NAS Unseen Data Challenge

- Form teams of up to 3 students (do not need to be the teams of the exercises)
- Check out the challenge, brainstorm on ideas together, what to do for your submission
- By June 15, 9am: Submit your 1-page proposal to **both** Andreas and me via mail `a.winje@ai.uni-hannover.de`, `m.wever@ai.uni-hannover.de`
- By June 19: Get feedback on your proposal
- July 1 – July 31: Submissions to the challenge (up to 7 submissions possible)
 - Office Hours (20min time slots): Thursday 10am-12pm (link for booking time slots tbd)
 - List Marius Lindauer, Marcel Wever, Andreas Winje as supervisors on your submission
- July 31: Submission of posters (template will be uploaded to StudIP) via mail to **both** Andreas and me
